NICE - ACTIMIZE

Xceed Online Retail

Xceed Online Retail is the only solution that provides comprehensive behavior analytics fraud prevention for online banking. Xceed Online Retail provides turnkey integrations with all major online banking platforms and offers seamless and rapid deployment.

Proven Fraud Prevention for Online Retail Banking

With the most precise alerts, fraud analysts can focus on the highest risk sessions, reducing tedious manual reviews and unnecessary customer callbacks. A holistic view of online banking activities with session-specific context helps fraud analysts effectively and efficiently identify account compromise and prevent unauthorized bill pay, P2P payment, and other online payment requests across all retail accounts.

Benefits

- Reduce fraud losses and risk by detecting the widest array of current and emerging fraud threats
- Improve operational efficiency and team productivity by providing prioritized alerts and rich context for unusual activity
- Enhance compliance by conforming to FFIEC guidance that recommends anomaly detection as part of your layered security strategy
- Enhance brand reputation and customer trust by proactively protecting online assets
- Improve competitiveness by expanding online offerings and service levels while mitigating associated risks

Key Features

- Analyze all online banking activities from login to logout
- Detect anomalous behavior based on device, geo-location, time, activities or transaction details, and many other factors
- Prioritized alerts based on risk score
- Rich session-specific context and account history
- Streamlined investigations with easy-touse interface
